

Skills - Insights

Introduction

I am trying to decide what to do for Stage 3 of my career.

Skills

My skills I enjoy are grouped as follows:

- Basic Skills: 6 out of 10
- Complex Problem Solving: 1 out of 1
- Resource Management: 2 out of 4
- Social Skills: 4 out of 6
- Systems Skills: 3 out of 3
- Technical Skills: 1 out of 11

A lot of the Skills I enjoy using are analytical, which coincides with my INTJ personality. It is also the reason I went to engineering school in the first place. But as I found out those same skills lend themselves to other Occupations than engineering, which is why I was attracted to finance.

Occupations

My skills pointed to business Occupations as the best fit - my top two Occupations use 12 of the 12 skills I enjoy using. Those two Occupations are listed #1 and #2 on my list.

- Chief Executives (e.g., CEO, President, CFO, COO, General Manager, Exec VP, Vice President)
- Treasurers and Controllers (e.g., Chief Financial Officer (CFO), Comptroller, Controller, Director of Finance, Finance Vice President, Treasurer)

Given I had worked in both of these roles it shows I have leveraged my skills wisely.

Education, something that interests me, also comes up as something my skills are applicable to.

Summary

Clearly I need to pursue roles in Stage 3 that leverage my analytical skills.
