What has Meaning & thus for which you have a passion

Begin at the End Exercise

On the career front I do have a passion for clothing. On the personal front I fell in love with NYC in high school and want to live there.

Autobiography Exercise

I am passionate:

- About my family, friends, soccer, and school
- But I chose what to be passionate about

I am a social person and friends are very important to me. For example, making friends in kindergarten that I am still friends with now, having to make new friends in middle school, reconnect with old friends in high school and completely new friends in college shows that I am good at making friends and establishing relationships

Soccer has been a passion of mine since 4th grade. It consumed my life through high school playing on high-level club teams and my high school team. I still play in college.

From this experienced I know the effort it takes to follow your passion.

Was able to start a business from the ground up in 7th grade (showed me that I would like to work in business world)

I realized competitive swimming was not a good sport for me (even though I was naturally good at it, I did not enjoy it). So I now know just because you are naturally good doesn't mean it is what you want to do.

Stories Exercise

For sure there will be no Passion for anything involving Math.

Math – Didn't Enjoy Doing Story Insights

Since I go to a college where they do not force you to take math or science, I am much more passionate about school and do not have to worry about the agony of doing math and science problems. However, I have learned from taking math and science that if I work hard at something, I can still do well. I know that life will require you to do things that you do not enjoy and I am glad that I still have the motivation to accomplish those things.

I know once I decide what has Meaning to me and for which I have Passion it will excite me like soccer does. I know the focus and hard work that went into my early soccer career will be equally valuable when I am pursuing my Right Career.

Soccer Endurance Story Insights

That dedication to soccer carried over to other parts of my life as well. Those long hours after soccer practices taught me that in the end, hard work pays off. I can play in college now because of the long hours I spent practicing.

Friendships – at work and outside work – have a huge meaning to me.

Long Term Friends Story Insights

Looking back, I realize that I would rather have a good amount of really good friends than a large amount of friends who I don't truly know. I also have learned that I can maintain long-term relationships, which is a very important talent to have in life. The people who have known you since you were a teenager are the people who can give you the best advice and support you later on in life. I know I will always remain close with my group of girl friends from high school and I know I can always count on them no matter what.

How to Measure Your Life Exercise

1) How can I be sure I will be successful and happy in my career?

In order to be successful and happy in my career, I need to make sure my hygiene factors, like status, pay, and job security are addressed if they become a problem.

However, I will not be entirely satisfied with my career unless I address the motivation factors as well. I need to make sure that I have personal growth in my career and that I feel like I am making a contribution to my company and even to the world. I can do this by making sure the company I am working for allows me to collaborate with my coworkers.

In addition, since I have taken a strengths test, I have found out that I have very high “idea euphoria” and “foresight”. I can use my strength of “idea euphoria” to my advantage if I work for a company that allows me to brainstorm ideas. I therefore would be good in marketing or public relations because those careers require you to come up with new ideas and strategies all the time. I have high “foresight” because I am a determined individual who will do almost anything to accomplish something that I want to accomplish. I have to be careful though that the things I want to accomplish will make me happy.

2) How can I be sure that my relationships with my spouse, my children, and my extended family and close friends become an enduring source of happiness?

First of all, if I want my relationship with my spouse to be a source of happiness for me, I must put myself in his shoes and think about what I need to give him to make him happy. This does not mean that I will succumb to all his wants and desires and not have my own desires and needs met, but rather just acting with selflessness.

Regarding my children, I must be able to show by example what it means to have solid values that will allow them to make good decisions as they grow up. Honesty and integrity are an example of the values I want to teach my children to rely on for success in the world.

With my extended family and friends, I need to make sure I do the small things such as write a thank you note for the presents they give me or return their calls. It is doing those little selfless acts in life that will ensure I keep the relationships that make me happy.

3) How can I live a life of integrity — and stay out of jail?

In order to live a life that I am proud of, I must be able to create a “likeness” component first. I must create a set of goals for myself that allow me to reach the end result that I am working towards for my whole life. The second component to live a life that makes me happy is to have a deep commitment to my goals that I am trying to create. The third component is to have a few metrics by which I measure my progress toward my goals. This way I can see that I am progressing toward a better future for myself.

In addition, I must always stick to my values and not let myself do something that could lead me down the wrong path. Even if I do something that I morally wrong once, it can put me at high risk for doing another morally wrong thing yet again.

Economic Engine Exercise

Following the train of logic of the MyRightCareer Venn diagram, if I am letting the Economic Engine circle be a major influence on my Right Career this exercise gave me some clear guidance on how much money I would need to make.

At Age 30 I am assuming I will be making \$149,000/year, which is a very large increase from the \$49,000 I am assuming I got in my first job out of college. This means I will have to choose a career (s) that have high income potential.

So I will need to choose something that leverages my natural strengths & personality, but also has a high income potential. I certainly will not earn a lot of money unless I can be my best and the career is a good fit for my personality and strengths.

This probably means the Meaning & Passion circle becomes the 3rd in priority. If I am fortunate I will find something that combines all three.
