Your responses on the MBTI assessment not only indicate your preferences; they also indicate the relative *clarity* of your preferences—that is, how clear you were in expressing your preference for a particular pole over its opposite. This is known as the *preference clarity index*, or *pci*. The bar graph below charts your *pci* results. Note that a longer bar suggests you are quite sure about your preference, while a shorter bar suggests you are less sure about that preference.
